## Great Salt Lake Minerals to Buy Chemical Plant in Wendover

THE ASSOCIATED PRESS

Great Salt Lake Minerals has signed a letter of intent to purchase Reilly Industries, Inc., a Wendover, Utah, chemical-production plant.

Jacqueline Fernetto, coordinator of corporate communications for Reilly, said the terms and conditions of the sale will depend on negotiations, but she expects the deal to be completed by the end of 1995.

Ogden-based GSL Minerals is a subsidiary of Harris Chemical Group Inc. of Overland, Kan.

Reilly is based in Indianapolis. The firm's Wendover operation includes 88,000 acres, 75 percent of which is private land, 5 percent on state land and 20 percent on Bureau of Land Management land. The BLM leases were signed Jan. 1, 1984, and are good for 20 years.

The 62 Wendover employees produce potash used in fertilizer, magnesium chloride used in a dust control compound and sugar processing and an ice control agent for roads.

Fernetto said the employees at the potash plant and the sales office will be part of the negotiations. She said Reilly purchased the plant in 1988 from Kaiser Aluminum and Chemical Corp.

Reilly officials said the company was founded in 1896 in Indianapolis and today employs 900 people. Reilly's chemical group produces more than 100 products including 70 percent of the world's pyridine and pyridine derivatives used in the production of pharmaceuticals, agriculture products, toiletries and rubber products.

GSL Minerals' history dates back to 1967 when Lithium Corp. of America tried to extract lithium from the lake brines. Lithium Corp. later was joined by Salzdetfurth, A.G., Hanover, Germany, with an emphasis on potash recovery.

In the late 1960s, the operation was acquired by Gulf Resources, then based in Houston. High start-up costs in the early 1970s forced Salzdetfurth out of the business.

ties fraud, wire fraud, mail fraud, and money laundering in connection with sale of shares in companies he controlled. Those companies were InterLink Data Network of Los Angeles, InterLink Fiber Optic Partners and Interlink Video Phone Partners.

In January, Gartner was jailed for civil contempt in the Metropolitan Detention Center in Los Angeles for violating a judge's order that he turn over \$12.3 million.
